Virtual CME -Pathophysiology of anaemia

Organized by the department of Physiology on 07-04-2021 -talk by Dr B Jaya, Associate Professor Department of Physiology, KVMC.

Anemia has significant consequences for human health, as well as for social and economic development. In 2010, anemia accounted for 68.4 million years of life lived with disability, or 9% of the total global disability burden from all conditions. Anemia has been associated with negative health and development outcomes, including neonatal and perinatal mortality, low

birth weight, premature birth and delayed child development.

The negative effects on health and development outcomes from anemia arise from the impacts of decreased oxygen delivery to tissues (in which multiple organ systems may be affected), as well as effects related to the underlying causes of anemia, which are difficult to disentangle. For example, in iron deficiency anemia (IDA), decreased iron availability has well-established negative effects on brain development and functioning even prior to anemia development.

INTER COLLEGE MEET - SRIHER, SBMCH and Sree Mugambika institute of medical
on 09-04-2021

Pannel Discussion On

1. Metastatic genital crohns disease
2. Pigmentd basal cell epithelioma masquerading as nodular melanoma
3. Interesting case of metabolic syndrome with cutaneous manifestations

PATENTS

SREE BALAJI MEDICAL COLLEGE & HOSPITAL, BIHER- BHARATH UNIVERSITY, has filed as much as 42 patents and there exists a constant raise in filing of patents every year. Out of which 6 patents have been granted by the Indian Patent Office. The details are as follows:

1. Apparatus for determining bone mineral density (BMD) from anthropometric, femoral morphometry and geometric factors. **Inventors: Dr.Prabhu.K,**
2. Pharmaceutical composition exhibiting antiviral activity against Human parainfluenza virus. **Inventors: Dr.G.Bupesh**
3. ECO – Embalming fluid **Inventors: Dr.G.Durga Devi**
4. A fixative changing pump for removing used old formalin from museum jars **Inventors: Dr.T.Gayathri Devi**
5. A novel biocompatible sustained-release nano-particle pharmaceutical formulation for treating multi drug resistant bacteria. **Inventors: Dr. Dr.G.Bupesh**
6. Bio- synthesis of Egg albumin doped Zinc oxide nanoparticles exhibiting anticancer property. **Inventors: Dr.G.Bupesh**

Following 6 Patents Published awaiting for Grant

PATENT

Invention Title: A Pharmaceutical Composition Exhibiting Antiviral Activity Against Human Parainfluenza Virus
Patent Filed No. 20174103171, Dt. 05/09/2017
Publication on (U/S 11A): 24/11/2017
Granted on: 04/03/2021

Sl. No. / Patent No. 20174103171
 Subject: A Pharmaceutical Composition Exhibiting Antiviral Activity Against Human Parainfluenza Virus
 Date of Filing: 05/09/2017
 Date of Publication: 24/11/2017
 Date of Grant: 04/03/2021

It is hereby certified that a patent has been granted to the patentee for an invention entitled A PHARMACEUTICAL COMPOSITION EXHIBITING ANTIVIRAL ACTIVITY AGAINST HUMAN PARAINFLUENZA VIRUS as disclosed in the above mentioned application for the term of 20 years from the 4th day of September 2017 in accordance with the provisions of the Patents Act, 1970.

Virtual CME on "Myocardial Infarction" on 15-04-2021

Organized by the department of Anatomy

-Talk by Dr. C. R. MadhuPrabhu
Doss Professor Interventional
Cardiologist, Apollo.

Acute myocardial infarction is the medical name for a heart attack. A heart attack is a life-threatening condition that

occurs when blood flow to the heart muscle is abruptly cut off, causing tissue damage. This is usually the result of a blockage in one or more of the coronary arteries.

Symposium on HAEMANGIOMA- on 23-04-2021

Organized by the department of DVL, Haemangiomas are seen more frequently among premature infants. A haemangioma is a birthmark that grows during the first year of life and fades over time. It can appear on the face, scalp, chest or back.

Most haemangiomas disappear on their own. In rare cases, a haemangioma can interfere with vision or cause other symptoms, and can be treated with drugs or laser surgery.

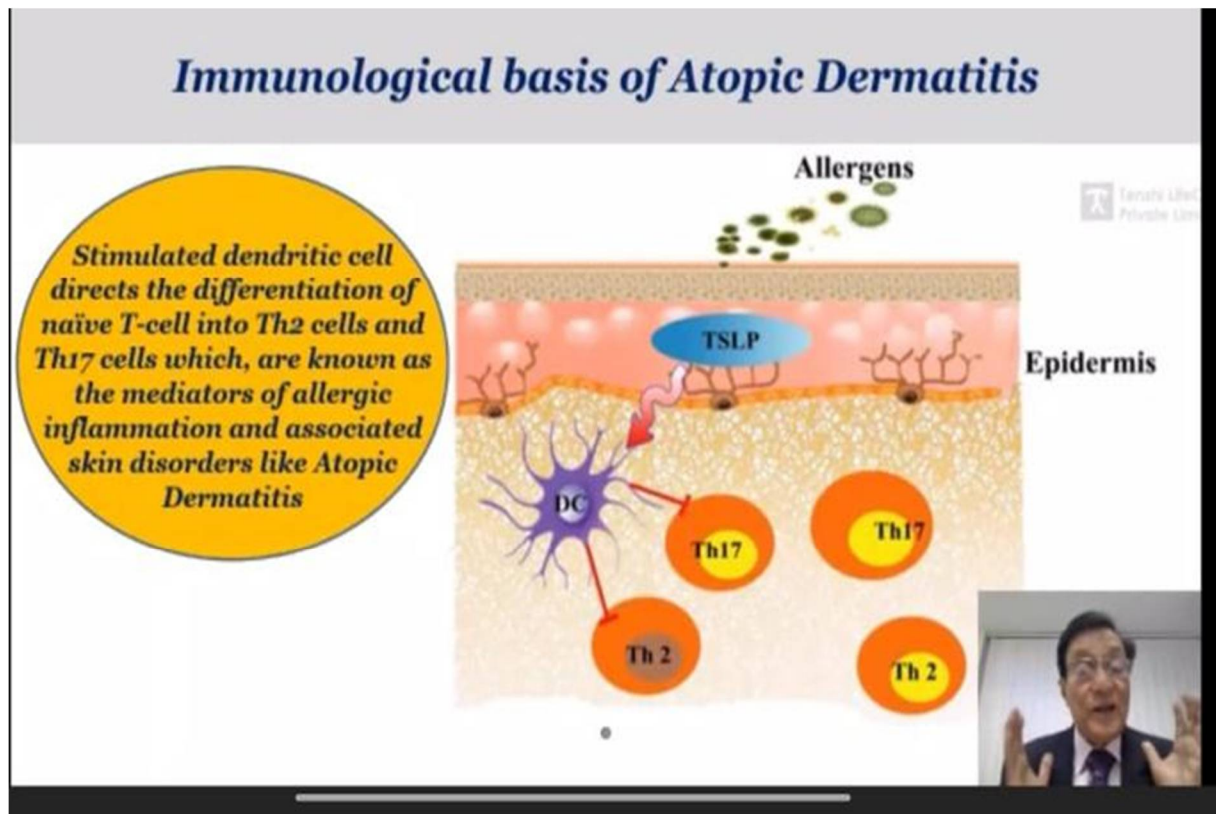

A haemangioma is a birthmark that grows during the first year of life and fades over time. It can appear on the face, scalp, chest or back.

Most haemangiomas disappear on their own. In rare cases, a haemangioma can interfere with vision or cause other symptoms, and can be treated with drugs or laser surgery.

Preconference workshop on Essentials of molecular Biology Techniques for Clinicians by Dr.T.Yugendran, Assistant Professor Principal Scientist ,Genomics Division Eligo Genetics and Ms.Evagelin, SRMC on 24-06-2018

Virtual CME on “Liver Diseases

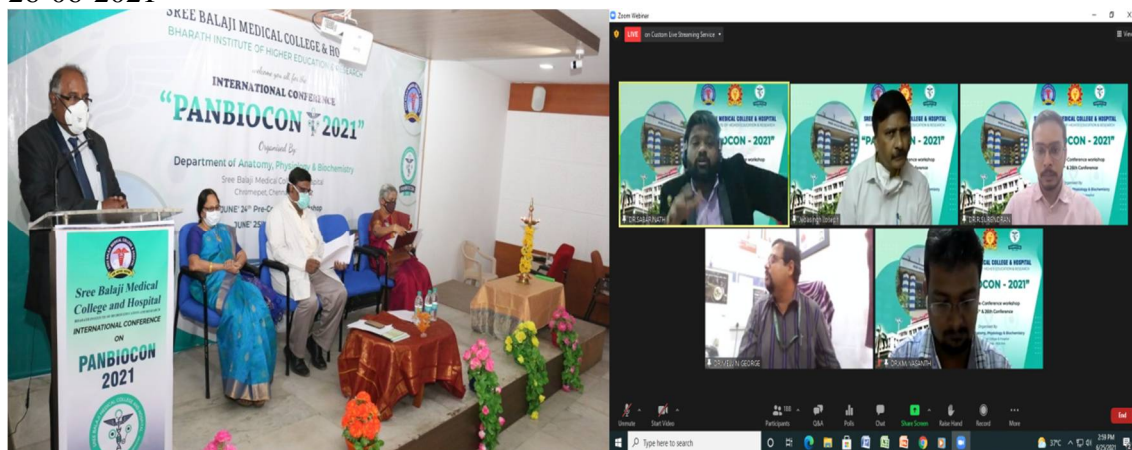

An Overview” Organized by department of Anatomy by Dr.Joseph Jensingh Babu M.D (Int-Med)., DNB(Gastro)Associate Professor Consultant Gastroenterologist &Hepatologist Managing Director, Annai Arul Hospital, Tambaram, Chennai

Chronic liver diseases in children represent a rising problem with significant effects on public health. In fact, several paediatric liver diseases are precursors of adult chronic hepatopathies, cirrhosis and hepatocellular carcinoma. The prevalence of liver diseases in children is unknown. Every year, 15,000 children are hospitalized for liver diseases, but these disorders continue to be under-recognized or diagnosed late. The main reason is due to the frequent absence of symptoms in the vast majority of liver diseases, especially in the early stages.

PANBIOCON- 2021

International Conference on Molecular biological Techniques and strategies in medical research Organized by the departments of biochemistry, anatomy, physiology on 25-06-21 to 26-06-2021

World Yoga Day

Yoga is an invaluable gift of India's ancient tradition. It embodies unity of mind and body; thought and action; restraint and fulfilment; harmony between man and nature; a holistic approach to health and well-being. It is not about exercise but to discover the sense of oneness with you, the world and the nature. By changing our lifestyle and creating consciousness, it can help in well-being. Let us work towards adopting an International Yoga Day.

Yoga is a trend that has been flourishing from the years; rather this has become a trendsetter in maintaining both physical and mental well-being. Each Yogic activity is a key to improving flexibility, strength, balance and attaining harmony.

Sree Balaji Medical College wins 6 patents

Chennai, June 5: Sree Balaji Medical College & Hospital, BHER- Bharath University, has become the only private institution of medical education in Tamil Nadu to obtain grants as many as 6 patents. It has filed for 50 patents so far and is aiming to take the number to 100 by the end of the current academic year.

Prof Mohamed Rela, Chairman, Rela Hospital honoured the 6 Inventors who had obtained the patents from Indian Patent Office recently.

for various research publications. All these have become possible because we have a vibrant and thriving research ecosystem. We regularly conduct workshops and seminars for the students to acquire knowledge about intellectual property rights."
