### **CME on "Management of Testicular Tumours"**

Department of Surgery & Medical Education Unit CME Programme on "Management of Testicular Tumours" 17th November 2016. Speaker: Prof. SUBBIAH SHANMUGAM, HOD & Prof. Dept of Surgical Oncology. Govt. Royapettah Hospital. Kilpauk Medical College. Chennai. Testicular cancer is curable. While a cancer diagnosis is always serious, the good news about testicular cancer is that it is treated successfully in 95% of cases. If treated early, the cure rate rises to 98%.

Typically, radical inguinal orchiectomy is the treatment for Sertoli cell and Leydig cell tumors. Radiation therapy and chemo generally don't work for these rare types of testicular tumors. If the doctor suspects the tumor has spread beyond the testicle, the retroperitoneal lymph nodes may be surgically removed.

## **CME Programme on "ROLE OF HAEMOGRAM IN THE MANAGEMENT OF ACUTE FEBRILE ILLNESS"**
