Topic : Oncogene

Presenter : Dr.Salsabiel Nijamudeen

Moderator:Dr.J. Thanka

My presentation was on Topic oncogene . I explained the cell cycle and how if any DNA damage or genetic mutation would lead to malignant transformation of a cell. And explained the proto-oncogenes that encodes each receptor involved in the cell proliferation pathway and what will happen , if overexpression / amplification / translocation of them occur. And gave examples on how it's implied for therapeutic purpose.
